

Frequently Asked Questions

Robus Leather Floor Tiles

What is bonded leather?

Robus bonded leather floor tiles are made from 100% leather fibers. Chrome or vegetable tanned leather shavings are milled to the fiber then reconstituted with natural binding agents to create durable bonded leather.

Are Robus Leather Tiles a “green” product?

Yes. Robus recycles leather that would otherwise be placed in a landfill. The commercial grade shavings are the by-products from the footwear, accessory, furniture, and automobile industries.

How durable are Robus Leather Tiles?

Our unique tiles are rugged and durable. Robus offers a 25 year limited Residential Warranty and a 5 year limited Commercial Warranty.

Should I use a professional to install my floor?

We recommend contacting a professional installer if you are not experienced in installing floors. The installer you select should have experience working with natural products and sheet vinyl. Provide your installer with the instructions included with your tiles. Visit www.robust.com for updates on installation instructions.

Is the embossing random?

Yes. The embossing is random. No one tile will match the exact pattern on another tile. Consider rotating each tile.

Are Robus Leather Tiles a seamless product?

No. Robus Leather flooring is not designed to be seamless flooring.

Is Robus Leather Tile suitable for installation over radiant floor heating?

No. Installing Robus Leather Tiles over radiant heat systems is not recommended.

Are Robus Leather Tiles suitable for an outdoor desk or other exterior applications?

No. Robus Leather Tile is solely intended for interior use.

What installation methods are recommended for Robus Leather Tiles?

Visit www.robust.com for the installation instructions.

What adhesive should I use to install Robus Leather Tiles?

After many years of testing, we have found the perfect adhesive for our tiles. Use BASF CX-1000 Adhesive or DriTac 7500 for all floor installations.

What is Robus Sealant?

All tiles should be protected with Robus Protective Coating and Sealant. Robus Sealant is a two-part urethane finish that is applied over the top of the tiles to protect against stains, abrasions, and sunlight. The sealant also seals the tiles seams and protects from moisture. A second or third coat may be applied for high traffic areas. For application instructions, please visit www.robust.com.

How do I clean Robus Leather tiles?

Maintain and clean tiles by using a damp rag or damp mop. Never use harsh detergent cleaners, liquid floor waxes, polishes, or ammonia. Use a gentle soap to clean sticky spills. Use a soft brush attachment when vacuuming.
